BLOOD GROUP TESTING

First Year Degree Students

2020-2021

BLOOD GROUPING TESTING AND AWARENESS PROGRAMME

FROM 30.03.2021 to 31.03.2021

Organized by Department of Zoology

A Two day long free Blood group testing and awareness camp was organized by Department of Zoology from **30.03.2021 to 31.03.2021** to determine the Blood Groups of first year degree and post graduate students of our college. The test is necessary for transfusion or to donate blood. Not all blood group and types are compatible, so it is important to all students to know their blood group and understand the importance of voluntary blood donation. Mass blood grouping camp was conducted by trained B.Sc III year CBZ students of our college, at which more than **435** students were tested to know their blood group which is documented to help the needy. The students will also enter their blood groups in their identity card which will be helpful for them during medical emergency.

Sri Dr. D. Bala krishna Principal of our college addressed the students about the importance of knowing their Blood Groups and urged the students to serve the community as a blood donor in blood donation camps. Smt. D.A.Kiranmayee HOD Zoology, of this college, trained the Biology students in conducting the Blood Grouping test and advised that the students should transform their classroom knowledge to serve the community.

The Department Zoology faculty members took part in the activity for making this programme a grand success.

AIMS AND OBJECTIVES

- The aim of this study was to evaluate blood group distribution among male and female students.
- To identify the rare groups the AB^{-Ve} , A^{-Ve} , B^{-Ve} and O^{-Ve}.
- To prepare a data base of blood groups of students.

DATA COLLECTION AND PROJECT DESIGN

ABO and Rh blood group system remains so far the most significant in blood transfusion. The magnificent discovery of ABO blood group system is credited to Austrian scientist Karl Landsteiner in 1900.

The study was done during March 2021 in department of zoology, A.G & S.G.S. Degree College, Vuyyuru. A pre designed questionnaire was used to

collect the information from the students regarding their age, gender, caste, class, roll number, Adhar number, E-mail Id and Phone number. Blood grouping and BMI is done by the students of III B.Sc. BZC students.

Materials and Methods: The available data of 435 students of I year degree and PG students courses was analyzed in every required aspects i.e sex, age, ABO and Rh blood groups and BMI. The standard anti sera (A,B,& D) were used to determine the blood group.

Results: The available data of **435** students was analysed. The age group was homogeneous in our study i.e from 17-20 years. It was found that the predominant blood group in current study was blood group O^{+ve}, followed by B^{+ve}, then A^{+ve} and least common AB. Blood group O (40.2%) was the most common blood group in both genders followed by B (34%), A (17%), & AB (5.2%).
