Speaker: Sri Sathyanarayana garu , speaks about Women – he have been the ones who are doing so much work behind the scenes and are never credited for it. Our grandmothers, mothers and sisters play such an important and integral role in our lives and sadly they are reduced to just that and no one even value or appreciate them. Valuing them by empowering and paying heed to their voices is very important. And this can be done by putting them in positions of power where they get to make decisions. Only then will we see real change and there will be growth. In this article on women empowerment speech, we will delve into its meaning and importance.

Conclusion:

It is these educated girls who become women with self-confidence, intellect and conscience who excel in every field and can also become heads of the department and be decision-makers. Education is a great tool to empower women as it will bridge all other gaps in our society and we as a nation will prosper.
