

A. G. & S. SIDDHARTHA DEGREE COLLEGE OF ARTS AND SCIENCE, VUYYURU
WOMEN EMPOWERMENT AND ANTI SEXUAL HARASSMENT CELL

2021-2022 Activities

The UN theme for this year's International Women's Day is “Gender equality today for a sustainable tomorrow, recognizing the contribution of women and girls around the world, who are leading the charge on climate change adaptation, mitigation, and response, to build a more sustainable future for all.”

1. Title of the Activity : **Inter National Women’s Day**
Date organized : 08. March .2022
Name of the guest : Smt. Dr. Sudha Nageswara Rao.

Report of the Event

Theme: Gender equality today for a sustainable tomorrow,

AIM: It offers an opportunity to reflect on progress made, to call for change and to celebrate acts of courage and determination by ordinary women who have played an extraordinary role in the history of their countries and communities.

Speaker: Mrs.Dr. Sudha Nageswara Rao spoke in this way on the occasion of International women’s day It could not come at a more opportune time, with climate change manifesting in increasing temperatures, rising sea levels, changing rainfall patterns, and more frequent and severe extreme weather conditions. Compounded by the impacts of the COVID-19, these conditions have direct consequences for the key determinants of health, negatively impacting air and water quality, food security, and human habitat and shelter.

Women and girls, especially those living in rural, poor and remote vulnerable areas in low- and middle-income countries, including Small Island Developing States, are more susceptible to changing climatic conditions. Due to their gender, they bear a disproportionate burden of the effects of climate change in their social and reproductive roles.

Women and girls are also at higher risk for sexual violence, sexual exploitation, and abuse, trafficking and intimate partner violence, along with psychological stress, anxiety and depression in response to displacements as a result of climate change events. To address the challenges, gender-responsive action is needed, along with equitable development that recognizes and addresses the particular vulnerability of women and girls to the consequences of climate change.

Conclusion:

In closing, let us all remember that overcoming these inequities will result in better health, development and prosperity for all.

Felicitation to the Chief guests Smt. Dr. Sudha ,Dr. Nageswara rao
