Topic : “ Renewable Energy-Solar Panel Manufacturing & Installation ”

Date Conducted : 04-07-2019

Name and Designation of the Resource person: N.V.S. Teja Kumar, Sunrays Green Power Solutions, Bhattiprolu, Guntur District.

Report on the guest lecture:

Objectives: To develop the awareness on Renewable Energy - Solar Panel Manufacturing & Installation among students.

Notes on lecture: In today's climate of growing energy needs and increasing environmental concern, alternatives to the use of non-renewable and polluting fossil fuels have to be investigated. One such alternative is solar energy. It is a **RENEWABLE SOURCE OF ENERGY** .

Solar energy powers the environment and life on the planet so there's no energy source more earth-friendly. Compared to the burning of fossil fuels, which release greenhouse gases, and carbon dioxide, solar cells do not release anything harmful into the air as they convert the sun's energy into electricity.

Outcome :

- Students are able to understand the need of Renewable Energy sources.
- Students are able to understand the installation process of solar cells.
- U.Ram Prasad, HOD of Physics Dept, N.V.S. Teja Kumar of Sunrays Green Power Solutions Delivering their speech on solar panels installation.

Topic: Biodiversity conservation by using Natural farming

Date Conducted: 11.02.2022

Name and designation of the resource person: sri.s.krishna suman,Natural farming

Report on the guest lecture:

1. Objectives: Natural farming aims at restoring soil health, maintenance of diversity, ensure animal welfare, stress on efficient use of natural/local resources and promote ecological fairness.

Natural farming is an ecological farming approach where farming system

2. Notes on lecture: Important practices, essential for adoption of natural farming includes:

- No external inputs,
- Local seeds (use of local varieties), .
- On-farm produced microbial formulation for seed treatment (such as bijamrita),
- On-farm made microbial inoculants (Jivamrita) for soil enrichment,
- Cover crops and mulching with green and dry organic matter for nutrient recycling and for creating a suitable micro-climate for maximum beneficial microbial activity in soil.
- Mixed cropping,
- Managing diversity on farm through integration of trees
- Management of pests through diversity and local on-farm made botanical concoctions (such as neemastra, agniastra, neem ark, dashparni ark etc);
- Integration of livestock, especially of native breed for cow dung and cow urine as essential inputs for several practices and
- Water and moisture conservation. Natural farming aims at restoring soil health, maintenance of diversity, ensure animal welfare, stress on efficient use of natural/local resources and promote ecological fairness. Natural farming is an ecological farming approach where farming system

3. Outcome:

Natural farming generates employment on account of natural farming input enterprises, value addition, marketing in local areas, etc. The surplus from natural farming is invested in the village itself. Reduced Water Consumption:-By working with diverse crops that help each other and cover the soil to prevent unnecessary water loss through evaporation, Natural Farming optimizes the amount of 'crop per drop'.

Topic : “Emission of Light Past, Present and Future”

Date Conducted: 21-12-2020

Name and Designation of the Resource person: Prof.K.V.R.Murthy,President of fellow Luminiscence Society of India, Applied Physics Department,M.S.University of Baroda, Baroda.

Report on the guest lecture:

Objectives : To develop awareness of changes in Emission of Light Past, Present and Future

Notes on lecture: Light plays a vital role in our daily lives and is an imperative cross-cutting discipline of science in the 21st century. It has revolutionized medicine, opened up international communication via the Internet, and continues to be central to linking cultural, economic and political aspects of the global society.

First studies of optics 1,000 years ago to discoveries in optical communications that power the Internet today.

Outcome:

- Students learned about the changes of Emission of Light in Past, Present and Future .
- Their knowledge on emission of light and the properties of light also increased .
- The characteristics of light also observed and noticed
- Prof.K.V.R.Murthy,President of fellow Luminiscence Society of India, Applied Physics Department,M.S.University of Baroda, Baroda Delivering his speech on Emission of Light Past, Present and Future .

Report on the guest lecturer:

Objectives

The main objective to arrange to this guest lecturer is to give detail explanation of Mass spectrometry and its applications for post graduate students.

Notes on lecturer

Mass spectrometry, also called mass spectroscopy, analytic technique by which chemical substances are identified by the sorting of gaseous ions in electric and magnetic fields according to their mass-to-charge ratios. The instruments used in such studies are called mass spectrometers and mass spectrographs, and they operate on the principle that moving ions may be deflected by electric and magnetic fields.

Out come

The students well understand importance of applications of mass spectroscopy.

Report on the guest lecturer:

Objectives

The main objective to arrange to this guest lecturer is to give detail explanation Data Analysis for post graduate students.

Notes on lecturer

- Estimate the precision that can reasonably be expected from the method. Be certain that the outlying result is indeed questionable.
- Re-examine carefully all data relating to the questionable result in order to rule out the possibility that a gross error has affected its value. Remember that the only sure justification for rejection is the knowledge of a gross error.
- Repeat the analysis, if at all possible. Agreement of the newly acquired value with those that appear to be valid will support the contention that the outlying result should be rejected.
- If further data cannot be obtained apply the Q-Test. Also give consideration to reporting the median, rather than the mean value of the set. The median is the central value of the set and it will minimize the influence of the outlying result.

.Out come

The students well understand importance of applications of mass spectroscopy.

Topic: Thermodynamics

Date Conducted: -----.

Name and Designation of the Resource person:

D.Vimala Kumari lecturer in chemistry ANR college Gudivada.

Report on the guest lecturer

Objectives

To Explain Second law of thermodynamics Different Statements of the law, Carnot cycle and its efficiency, Carnot theorem, Concept of entropy, entropy as a state function, entropy changes in reversible and irreversible processes.

Notes on lecture

Thermodynamics is essentially the study of flow of energy. Its entire chapter is based on the underpinning that there is transference and transformation of energy from one form to another. Since the measurement of energy has to be about a specific system, class 11 Chemistry chapter 6 thermodynamics notes begin with elaborating various properties of a system

The chapter of thermodynamics in CBSE class 11 Chemistry is quite exhaustive in its content. A student has to learn multiple topics under this chapter, along with the relevant mathematical sums. To fully grasp the chapter, the core concepts must be clear at the outset. Students, while preparing this chapter, can download the PDF of the notes for free on Vedantu's official website.

The Electronic Filing System (or EFS) is the Singapore Judiciary's electronic platform for filing and service of documents within the litigation process. In addition, it provides the registries of the Supreme Court and the Subordinate Courts with an electronic registry and workflow system; and an electronic case file. Recent enhancements have added a module which facilitates the conduct of hearing using documents that have been electronically filed.

The EFS provides the legal profession with a rudimentary online case file from which documents can be electronically filed with the courts or served on the other parties in a case. The EFS is also the source for electronic cause book searches that are provided through the Litigation module of LawNet. EFS is set to be replaced by iELS eventually.
