and additionally monitor class attendance and performance. The same system has now been restructured and named Mentor system. Under the Mentor system, the full-time teachers of the college have been engaged as mentors of each class. Students of each class in the college are having a full-time teacher as their mentor. The classes, where there are huge numbers of students, have been assigned more than one mentor. At the beginning of the academic session, the class-wise names of the mentors are displayed on the college website/ Academic Calendar. The mentors are responsible for academic progress and psychological wellbeing of their mentees. They are also entrusted with the task of monitoring the attendance and academic progress of the students. They also provide primary psychological counselling to those who need them and refer them for more professional counselling, if required. At the beginning of the academic session, the mentors conduct orientation programmes for the mentees, whereby they are acquainted with the institution, its goals and mission, the facilities available and the regulations of the affiliating university. The mentors maintain the biographic details of each individual mentee including educational background and socio-economic status. They also maintain record of their class attendance, class-performance and academic progress. The mentors use both formal and informal means of mentoring. The mentor system, apart from its formal part, also exists as a robust informal mechanism to boost inclusiveness, gender sensitivity and social responsibility of students.

#### 5.4 – Alumni Engagement

5.4.1 – Whether the institution has registered Alumni Association?

Yes

The involvement of alumni in supporting and providing contributions voluntarily to their College is important for maintaining and expanding a College development. By establishing channels that can facilitate closer ties between the alumni, students and College, it can provide crucial benefits in enriching the student's experience while being at the College. Every alumni has experienced being a student to becoming a unique and different graduate, hence there is potential for all alumni to contribute to the College in different ways and scale. Alumni is an effective role model and can be easily accepted by students. With the return of the alumni to support the College, they bring with them credibility and justification as part of a successful College, having breathed the same air and encountering similar challenges faced by the students. Experiences that are shared by the alumni with students whether in time management, financial management, development of self-discipline and character, or in career management can be more easily accepted as guidance and inspiration by students. Through this way, alumni can assist in strengthening confidence, improve motivation and inculcate the right culture in line with

what the university intends to convey to its students. Competition in entering the work force is becoming more intensive as a result of a higher number of graduates compared with a limited number of job opportunities. Job availability is more critical in certain sectors. In the final year of their studies, students must identify seriously their career prospects. This is the right time for alumni to support the students by mentoring them on their career opportunities in the industry and opening channels for the students for acceptance, either in undergoing practical learning or work experience in the institutions where the alumni reside in. Alumni can be a reference for the faculty concerned in meeting the needs of students and graduates in obtaining work in selected fields. The curriculum at the university can be improved as to fulfill the work aspirations of the students. Besides that, the alumni can contribute by providing their expertise in their occupation in developing new study programs in the College. Alumni can contribute as a guest lecturer, advisor in committees, industry experts and cooperative partners in projects with the College. This will improve the development of their Alma mater. In the field of industry research, alumni can open doors for the College to enter into industry networks either in Software or overseas in the spirit of collaborative working. This gives opportunities to the College to improve in a particular industry by applying the theories that have been analyzed and tested with other industry experts. Success in knowledge transfer will further improve the capacity and the reputation of the College with significance nationally and internationally

### 7.2 – Best Practices

7.2.1 – Describe at least two institutional best practices

Best Practices Give details of any two best practices which have contributed to better academic and administrative functioning of the College. The College strives to promote students a sense of responsibility for their own development and an understanding of their obligations as members of a democratic society. The College fosters in students the desire to learn, the ability to think clearly and express themselves effectively, the habit of analytical and reflective thought, and an awareness of themselves, their heritage, other cultures and their environment. The following two best practices are worth mentioning in this context. Best Practice: I Title of the

Practice:Participative Administration Objectives of the practice: The main objectives of this practice are • To be accountable to the work. • To improve employee relations by inculcating mutual co-operation and co-ordination. • To improve quality of the programmes by sharing expertise knowledge. • To become more competitive. • Tap the unused potentialities of the staff and students. The Context: Planning is the real starting point within the organisation. So, all staff should take preliminary look at possible future opportunities for the development of the curricular and technology. The growth of participatory and work innovative programmes such as participative management, staff involvement by formulating committees and students involvements through quality circles has been introduced. The Practice: It is the usual practise to conduct all the

activities through various committees such as • Research committee is formulated to promote research culture among the staff. • Career Guidance and Placement Cell brings the employment and career opportunities to the door steps of the college for the benefit of students. Evidence of Success: By introducing various committees all the staff members are made accountable. Their innovative thoughts are used either one way or other for the development of the college. Staff members have been made responsible for the duty assigned to them. It leads to competitions among the staff members to prove themselves. With the promotion of student centric activities through quality circles focus is laid on training students in multi skills which promote holistic development.

Problems Encountered Resources required: Co-ordination among the staff of various departments to conduct activities in difficult tasks to motivate the students in conducting student centric activities has become a challenge. Staff and students should show much interest to conduct various activities proposed by the college. The college has to bear the expenditure involved to conduct various activities by the staff and students Best Practice: II Title of the Practice: Tutor-Ward System Objectives of the practice: To Strengthen the bond between the teacher and thought to provide academic support to the students. The Context: To check indiscipline, irregularity and lack of motivation among the students, the Principal and the teachers thought of introducing Tutor-Ward System to motivate the students. The practice yielded rich fruit. As a result students became more and more enthusiastic and started participating in all the curricular and extracurricular activities of the college. The Practice: Every faculty member is ward tutor with 30 students under her/his care. She/he meets them one hour every week and takes care of: • Mentoring and guiding them in academic and non-academic activities. • Charting their progress through maintenance of progress reports. • Ensuring that her/his wards are aware of all the facilities provided in the college such as Library, Network Resource Centre, Career Guidance Placement Cell, etc. • Instilling values of Discipline, Punctuality, Regularity, Innovation, Confidence through one-to-one counselling, Group Dynamics and Group activities, Seminars for students, Quiz and Field trips etc. • Conducting Parent-Teacher meeting to inform parents about progress of their wards. • Acting as Guide and Counsellor. After charting their progress through progress reports, students are divided into weak, slow, advanced and strong learners. Accordingly the following measures are taken to provide knowledge to them. Weak Learners: • Crash Course for 15 days • Remedial Classes • Group Study • Each one - Teach one Slow Learners: • Group Discussions • Using OHP • Revision Advanced Learners: • Class room Seminars • Preparing for Competitions • Knowledge extension programmes Strong Learners: • Class room Seminars • Preparing for Competitions • Power Point Presentations • Preparation for Oral presentations. Evidence of Success: Reports from the Heads of the department revealed that more than 50 students have shown remarkable change in their attitude to academic pursuits. It helped the students to improve their all round personalities and solve their problems. Problems Encountered Resources required: It takes some time on the part of the teachers to trace out slow learners. College has to bear the expenditure involved in sending the messages to the parents regarding the performance of the students. The additional information regarding Innovation and Best Practices, Which the College would like to include. Best Practice: III Title of the Practice:Blood Grouping Donation Objectives of the practice: The main objectives of this practice are • To understand the basic concept of Blood Grouping • To acquaint the students with their blood group • To enlighten the students about their blood group compatibility for transfusion. The Context: Blood groups are created by molecules present on the surface of red blood cells (and often on other cells as well). Every year our nation requires about 4 Crore units of blood, out of which only a meagre 40 Lakh units of blood is available. The gift of blood is the gift of life. There is no substitute for human blood. Every two seconds someone needs blood. More than 38,000 blood donations are needed every day. A total of 30 million blood components are transfused each year. The average red blood cell transfusion is approximately 3 pints. The blood type most often requested by hospitals is Type 0. Sickle cell patients can require frequent blood transfusions throughout their lives. More than 1 million new people are diagnosed with cancer each year. Many of them will need blood, sometimes daily, during their chemotherapy treatment. A single car accident victim can require as many as 100 units of blood. Blood cannot be manufactured - it can only come from generous donors. We should be able to cater the blood need of at least 10 of the Indian population. It is not a difficult task at all if we keep spreading through word about our noble cause. Practice: Blood

grouping is done prior to a blood transfusion or when classifying a person's blood for donation. Blood grouping is a fast and easy way to ensure that you receive the same kind of blood during surgery or after an injury. If you are given incompatible blood, it can lead to blood clumping, or agglutination, which can be fatal. Every year a Blood Grouping Programme is being conducted to our first Degree student which is useful for donating the blood in emergency situations. The blood donation which is usually performed at a hospital or a clinical laboratory is done in our seminar hall in association with LION'S District 324C4 Blood Bank, Vijayawada. The blood type can be determined in a matter of minutes. Once the blood type is known, the student can donate blood and receive transfusions from donors in the compatible blood groups. The Third year B.Z.C. students have participated in the blood grouping programme and encouraged the First Degree students to donate the blood for the people who need it. Moreover, after blood grouping the students were given a report of the primary health check up along with the analysis of the blood which is an expensive task for the economically backward students. The LION's District 324C4 Blood Bank has done this free of cost. EXAMPLES OF BLOOD USE 1. Automobile Accident 50 units of blood 2. Heart Surgery 6 units of blood / 6 units of platelets 3. Organ Transplant 40 units of blood / 30 units of platelets 4. 20 bags of cryoprecipitate 25 units of fresh frozen plasma 5. Bone Marrow Transplant 120 units of platelets/ 20 units of blood 6. Burn Victims 20 units of platelets Evidence of Success: 100 units of blood have been contributed by our students during this year. The students are humble enough to donate blood whenever necessary. They take pride in donating blood to the needy. The NSS Units of the college and the Department of Zoology have been successfully conducting this Blood Grouping Blood Donation Programme. Problems Encountered: A few girl students were exempted from Blood Donation due to Anaemia and underweight. Resources required: Anti serums (material) are required.
